

Broadband Growth in the State of Minnesota

Changes in Fixed Broadband Service at the State Speed Tier Goal since April 2014

Newly Served Households: 67,600

Submit questions or recommended changes to: maps@connectmn.org

As required by the US Department of Commerce's State Broadband Initiative, if broadband service is available to at least one household in a census block, then for mapping purposes, that census block is reported to have some level of broadband availability. As such, broadband availability at an exact address location cannot be guaranteed. Providers supplying more specific data than census block are displayed as such.

Map users are encouraged to participate in improving broadband data granularity through data validation and field testing efforts.

Learn more about this and other broadband mapping facts at www.connectmn.org.

*MN Statute 237.012 indicates upload goal of 5 Mbps. Data collection only conforms with speed tiers as represented in the SBI NOFA where 6 Mbps is the most comparable.

This map represents areas of broadband service availability determined by ongoing, in-depth technical analysis of provider networks and accommodations for the impact of external factors on service quality. Satellite broadband services may also be available.
